Over 95 years of Tradition & Trust Continues

Heart disease is the commonly used phrase for a number of disorders affecting both the heart and blood vessels. A more apt term is cardiovascular disease. It is a leading cause of death and illness that affects millions of people worldwide

Functions of the cardiovascular system include (1) transporting nutrients to cells, (2) removing waste products through the intestines and other excretory organs, and (3) pumping oxygenated blood from the heart via the arteries and returning deoxygenated blood via the veins. The cardiovascular system works in tandem with the respiratory and nervous systems. It works with the respiratory system by taking the oxygen inhaled into the lungs to the rest of the body, and delivering carbon dioxide from the body to the lungs for expulsion. Impulses from the the sympathetic and parasympathetic nervous systems help regulate the heartbeat.

The heart is a cone-shaped organ, about the size of a clenched fist. Contrary to popular belief, the heart is not on the left side of the chest; it is almost central, but its most prominent pulsation is felt beneath the left nipple. It pumps blood throughout the body and averages 70 beats per minute in an average adult. This is accomplished via nerve impulses and contractions of muscles. The heart is loosely enclosed in a fibrous, protective, bag-like enclosure called the pericardium. The heart is comprised of 4 chambers. The top portion houses the atrium, of which there are right and left valves. The bottom portion of the heart contains the chamber known as the ventricle, of which there are also right and left valves.

Cardiovascular disease comprises of several symptoms and disorders; coronary artery disease (including arteriosclerosis, atherosclerosis, angina and myocardial infarction), hypertension, rheumatic heart disease and congenital heart disease. Coronary artery disease is the most frequent cause of death from cardiovascular disease.

In modern system of medicine, the drugs often used in the treatment are antiarrhythmics, antihypertensives, antiadrenergics, diuretics, antianginals and anticoagulants.

These drugs are effective but have a number of side effects like severe headaches, mild constipation, shortness of breath, dizziness, loss of appetite, heartburn etc. In chronic cases, the treatment is obviously prolonged. The herbal system has a number of medicines that not only provide symptomatic relief but attacks the root cause without any known side effects. Dehlvi has many useful preparations to treat cardiovascular disorders.

Arabian Nuskha

A natural home remedy that prevents heart blockage, angina and obesity. An ancient tried and tested formulation that cuts down fat reducing chances of cardiac dysfunction and tones up muscles into a fit and shapely body. No need to cut down on food or go into unscientific and cumbersome routine of extra ordinary regimen. It controls blood pressure, prevents thickening of blood and paralytic attacks, improves digestion, prevents skin diseases, improves intestinal strength and reduces stiffness and pain in the joints. It's great as a prophylactic for maintaining good health. Natural apple cider vinegar used in this preparation is raw, unpasteurized and unfiltered for maximum benefit.

Composition: Each 100 ml contains: Lemon Juice (Nimbu Ras), Ginger Juice (Adrak Ras), Garlic Juice (Lehsun Ras), Apple Cider Vinegar (Seb Sirka) each 12.5 ml, Honey (Shahed) 50 ml.

Indications: High blood pressure, high cholesterol levels, heart disease, gas and indigestion and obesity.

Dosage: With the pack.

Presentation: In packs of 200 ml and 500 ml

CardioSip

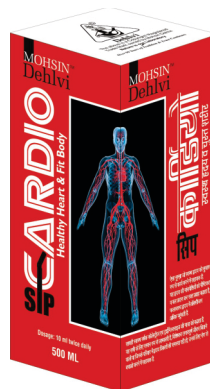

A formulation which supports a healthy heart function. It nourishes and strengthens the heart muscles thereby stimulating the blood circulation and allowing an increase of oxygen flow to the heart. Also helps to promote healthy cholesterol and triglycerides levels. It is beneficial for everyone, especially as a prophylactic for those who lead a stressful lifestyle or have a family history of coronary heart diseases.

Composition: Each 10 ml. contains: Hibiscus rosa-sinensis (Gurhal) 20 mg, Mesua ferrea (Nagkesar) 30 mg, Nardostachys jatamansi (Balcharr), Parmelia perlata (Ushna), Nymphaea lotus (Nilofar) each 50 mg, Saussurea lappa (Qust Shirin), Rheum emodi (Rewandchini) each 70 mg, Tribulus terrestris (Gokhru) 200 mg, Terminalia arjuna (Arjun) 500 mg, Rosa damascena (Arq Gulab), Pandanus odoratissimus (Arq Kewra) each 0.5 ml, Malus domestica Vinegar (Seb Sirka) 2 ml

Indications: Tachycardia, dyslipidemia, hyperlipidemia, angina, arrhythmia, palpitation, breathlessness, weak pulse, high cholesterol and post myocardial infarction.

Dosage: 10 ml in the morning and evening.

Presentation: In bottles of 200 ml and 500 ml.

Dehlvi Abresham Arshadi-SF

Khamira Abresham Hakim Arshadwala is presented in a revolutionary sugar free form. With all the goodness of Khamira Abresham Hakim Arshadwala, Dehlvi Abresham Arshadi-SF meets the demands of this modernized age. A good cardiac tonic. A famous Unani medicine for strengthening the heart and other vital organs of the body. Regulates the heart beat and increases circulation and formation of pure and healthy blood. Also useful in general debility, palpitation, anxiety, depression, melancholia, angina pectoris and convalescence. It lowers systolic and diastolic blood pressure and removes general debility.

Composition: Each dose of 3 g contains: Aquilaria agallocha (Ood Hindi), Nardostachys jatamansi (Balcharr), Citrus medica (Post Turanj) each 5.54 mg, Crocus sativus (Zafran), Pistacia lentiscus (Mastagi Roomi), Myrtus caryophyllus (Qaranfal), Elettaria cardamomum (Heel Khurd), Cinnamomum tamala (Sazaj Hindi) each 6.93 mg, Santalum album (Borada Sandal Safed), Ambra grasea (Ambar), Argentum Leaf (Warq Nuqra) each 8.32 mg, Pinus succinifera (Kahruba Shamai), Rubianus (Yaqut), Green Jasper (Yashab Sabz) each 12.47 mg, Mytilus margaritiferus (Marwareed) 16.79 mg, Borago officinalis (Arq Gaozaban), Rosa damascena (Arq Gulab), Salix caprea (Arq Bed Mushk), Malus sylvestris Juice (Aabe Seb Shirin), Punica granatum Juice (Aabe Anar Shirin), Pyrus cydonia Juice (Aabe Behi) each 194.05 mg, Bombyx mori (Abresham) 304.94 mg, Sorbitol 385 mg, Fructooligosaccharides Pdr. 1 g

Indications: Angina pectoris, anxiety, bradycardia, cardiac neurosis, depression, hyperlipidaemia, melancholia, mild hypertension, palpitation, phobias, post-myocardial infarction, stress and tachycardia.

Dosage: 3 g with milk or water in the morning on an empty stomach.

Presentation: In packs of 60 g and 125 g.

Dehlvi Arshad Gold Pills

Nothing removed except Sugar and nothing added except efficacy to the original formula. It is an excellent cardiac tonic. Arshad Gold Pills is the modernized sugar free form of the famous Khamira Abresham Hakim Arshadwala, which is used for strengthening the heart. It lowers systolic and diastolic blood pressure and regulates heart beat, increases circulation and formation of pure and healthy blood. Useful in general debility, palpitation, anxiety, depression, melancholia, angina pectoris, convalescence and general debility.

Composition: Each 500 mg pill contains: Ambra grasea (Ambar) 4 mg, Pistacia lentiscus (Mastagi) 5 mg, Crocus sativus (Zafran) 7 mg, Santalum album (Sandal), Elettaria cardamomum (Elaichi Choti), Aquilaria agallocha (Ude Hindi), Citrus medica (Post Turanj), Myrtus caryophyllus (Laung), Cinnamomum tamala (Tezpat), Nardostachys jatamansi (Balcharr), Rubianus (Yaqut), Jade (Yashab Sabz) each 10 mg, Mytilus margaritiferus (Marwareed), Pinus succinifera (Kahruba) each 15 mg, Malus sylvestris Spray Dried (Seb Shirin), Punica granatum Spray Dried (Anar), Pyrus cydonia Spray Dried (Behi) each 10 mg, Bombyx mori (Abresham) 333 mg, Rosa damascena Dist. (Arq Gulab) q.s.

Purity Assured

Indications: Angina pectoris, anxiety, bradycardia, cardiac neurosis, depression, hyperlipidaemia, melancholia, mild hypertension, palpitation, phobias, post-myocardial infarction, stress and tachycardia.

Dosage: 1 pill in the morning on an empty stomach.

Presentation: In packs of 10 Pills.

Dehlvi D.M.M Jawahri Capsules

Dawaul Misk Motadil Jawaharwali is presented in a convenient capsule form. A good cardiac tonic which strengthens the heart and other vital organs of the body and normalises blood pressure. Increases circulation and formation of pure and healthy blood. Also useful in general debility, palpitation, anxiety, depression, angina pectoris and convalescence.

Composition: Each 500 mg. capsule contains: Ambra grasea (Ambar) 4.25 mg, Aquilaria agallocha Ext. (Agar), Melissa parviflora Ext. (Badranjboya), Pistacia lentiscus (Mastagi), Parmelia perlata Ext. (Ushna), Elettaria cardamomum Ext. (Choti Elaichi) each 10.75 mg, Crocus sativus (Zafran) 15 mg, Portulaca oleracea Ext. (Khurfa), Rosa damascena Ext. (Gulab), Bombyx mori Ext. (Abresham), Cinnamomum zeylanicum Ext. (Darchini), Centaurea behen Ext. (Behman Safed), Salvia haematodes Ext. (Behman Lal), Doronicum hookeri Ext. (Darunaj Aqrabi), Mytilus margaritiferus (Marwareed), Pinus succinifera (Kahruba) each 21.25 mg, Bambusa arundinacea (Tabashir), Santalum album Ext. (Sandal Safed), Pterocarpus santalinus Ext. (Sandal Surkh), Coriandrum sativum Ext. (Dhania), Borago officinalis Fl. Ext. (Gaozaban), Emblica officinalis Ext. (Amla) each 32 m, Berberis aristata Fr. Ext. (Zarishk) 43.75 mg

Indications: General Debility, palpitation, angina pectoris, hypotension, hypertension, convalescence, syncope and weakness of liver.

Dosage: 1 capsule in the morning on an empty stomach.

Presentation: In packs of 14 Capsules.

Dehlvi Dawaul Motadil Jawahri-SF

Dawaul Misk Motadil Jawaharwali is presented in a revolutionary sugar free form. With all the goodness of Dawaul Misk Motadil Jawaharwali, Dehlvi Dawaul Motadil Jawahri-SF meets the demands of this modernized age. A good cardiac tonic. Strengthens the heart and other vital organs of the body and normalises blood pressure. Increases circulation and formation of pure and healthy blood. Also useful in general debility, palpitation, anxiety, depression, angina pectoris and convalescence.

Composition: Each dose of 5 g contains: Ambra grasea (Ambar) 15.9 mg, Pistacia lentiscus (Mastagi Roomi), Parmelia perlata (Ushna), Elettaria cardamomum (Dana Heel Khurd) each 31.7 mg, Aquilaria agallocha (Ood Hindi),

Nature is our Laboratory

Nepeta cataria (Badranjboya) each 39.7 mg, Crocus sativus (Zafran), Rosa damascena (Gule Surkh), Cinnamomum zeylanicum (Darchini), Centaurea behen (Behman Safed), Salvia haematodes (Behman Surkh), Doronicum hookeri (Darunaj Aqrabi), Bombyx mori (Abresham), Mytilus margaritiferus (Marwareed Mehlool), Pinus succinifera (Kahruba Mehlool) each 55.5 mg, Bambusa arundinacea (Tabasheer Kabood), Santalum album (Sandal Safed), Pterocarpus santalinus (Sandal Surkh), Coriandrum sativum (Kishniz Khushk), Borago officinalis (Gule Gaozaban), Emblica officinalis (Amla Khushk), (Portulaca oleracea (Tukhme Khurfa Siah), Argentum Leaf (Warq Nuqra) each 79.3 mg, Berberis aristata (Zarishk) 119 mg, Malus sylvestris Juice (Aabe Seb Shirin) 591 mg, Sorbitol 825 mg, Fructooligosacchrides Pdr.

Indications: General Debility, palpitation, angina pectoris, hypotension, hypertension, convalescence, syncope and weakness of liver.

Dosage: 5 g in the morning and evening with a glass of milk or water.

Presentation: In packs of 60 g and 125 g.

Dehlvi Heartone-DR

It contains ingredients that are useful in several cardiovascular diseases such as palpitation, angina, hyperlipidemia and post-myocardial infarction. It has a soothing effect on the nervous system thereby controlling tachycardia, anxiety, phobias, stress and depression. It also lowers systolic and diastolic pressure. It is completely safe and can be used without any side effects for a prolonged period. In mild cases it is effective alone and in severe cases it can be combined with other drugs.

Composition: Each 250 mg gold coated pill contains: Corallium rubrum Calx. (Kushta Marjan) 30 mg, Mytilus margaritiferus (Marwareed) 32 mg, Piper nigrum (Kali Mirch) 37 mg, (Bacopa monnieri (Brahmi) 150 mg

Indications: Angina pectoris, anxiety, bradycardia, cardiac neurosis, depression, hyperlipidemia, melancholia, mild hypertension, palpitation, phobias, post-myocardial infarction, stress and tachycardia.

Dosage: 1 pill with water or 5 gms. Khamira Marwareed in the morning or as and when required.

Presentation: In packs of 10 Pills.

Dehlvi Khamira Moti-SF

Khamira Marwareed is presented in a revolutionary sugar free form. With all the goodness of Khamira Marwareed, Dehlvi Khamira Moti-SF meets the demands of this modernized age. Relieves palpitation and anxiety states. Strengthens the heart and is very useful in infantile epilepsy and general debility. In chicken pox and measles it protects the heart and other chief organs of the body and is very useful during convalescence after such diseases.

Composition: Each dose of 5 g contains: Pinus succinifera (Kahruba), Bambusa arundinacea (Bansalochan), Green Jasper (Yashab), Serpent Stone (Zahar Mohra), Santalum album (Sandal Safed), Argentum Leaf (Warq Nuqra), Mytilus margaritiferus (Marwareed) each 49.13 mg, Cydonia oblonga Juice (Aabe Behi),

Purity Assured

Malus sylvestris Juice (Aabe Seb Shirin), Punica granatum Juice (Aabe Anar Shirin) 842.19 mg, Sorbitol 0.842 g, Fructooligosacchrides Pdr. 1.263 g, Arq Gulab (Rosa damascena) q.s.

Indications: Anxiety, palpitation, weakness of heart, infantile epilepsy, general debility, chicken pox, measles, convalescence and calcium deficiency.

Dosage: Children according to age to be given 1 to 5 g and adults 5 g in the morning on an empty stomach and evening or as and when required with Arq Gaozaban or water.

Presentation: In packs of 60 g and 125 g.

LipoCap

LipoCap helps to lower cholesterol naturally, regain proper cholesterol management, reduce "bad" LDL-Cholesterol and Triglyceride levels within the blood system, and increase "good" HDL-Cholesterol levels. The ingredients in this herbal formula have been shown to help inhibit Cholesterol production and lower cholesterol naturally, help metabolise and reduce fatty acids within the blood-stream and upon heart and arterial tissue and help monitor and maintain appropriate levels and proportions of circulatory fats (Cholesterol and Triglycerides).

Composition: Each 500 mg capsule contains extracts of: Sad Kufi (Cyperus rotundus), Gurmar (Gymnema sylvestre), Arjun (Terminalia arjuna), Guggal (Commiphora mukul) each 50 mg, Behman Surkh (Salvia haematodes), Tukhme Piaza (Allium cepa), Lahsuh (Allium sativum) each 100 mg.

Indications: Hyperlipidemia, atherosclerosis and High Cholesterol Level.

Dosage: 2 capsules twice a day with water.

Pressure-Eaze

It treats hypertension by balancing and regulating blood pressure and it also addresses some of the contributory factors which may be causing it. While some of the ingredients in Pressure-Eaze Capsules specifically target blood vessels which have become constricted, others improve the heart's ability to pump blood effectively, while also treating and preventing plaque build up in the arteries. Pressure-Eaze Capsules also helps to reduce stress and boost the body's ability to fight illness.

Composition: Each 500 mg capsule contains: Succinum (Kahruba) 50 mg, Rosa damascena (Gule Surkh Ext.), Elettaria cardamomum (Elaichi Khurd), Santalum album (Sandal Safed) each 100 mg, Rauwolfia serpentina (Asraul Ext.) 150 mg

Indications: Hypertension, insomnia, stress and anxiety.

Dosage: 1 capsule in the morning and at night with water. Do not exceed recommended dosage.

Presentation: In packs of 28 Capsules.

Nature is our Laboratory

SINGLE HERBS

Arjuna Capsules/Tablets

It helps maintain a healthy heart and reduces the effects of stress and nervousness. promotes effective cardiac functioning and regulates blood pressure. It has been the herb of choice in Ayurveda for cardiovascular health. Its ability to suppress the blood's absorption of lipids indicates that it has cholesterol-regulating properties. It is also useful as an anti-ischemic and cardioprotective agent in hypertension and in ischemic heart disease, especially in disturbed cardiac rhythm, angina or myocardial infarction. It is also known to relieve symptomatic complaints of essential hypertension viz. giddiness, insomnia, lassitude, headache and the inability to concentrate. It also reduces coagulation, bleeding and prothrombin time.

Composition: Each 250 mg capsule/tablet contains: Arjuna Ext. (*Terminalia arjuna*) 250 mg

Indications: Angina, High LDL Cholesterol Levels, Hypertension, Hyperlipidemia, Ischaemic Heart Disease, Myocardial Infarction, Nervousness and Stress.

Dosage: 1 capsule/tablet in the morning and at night with water. Do not exceed recommended dosage.

Presentation: In packs of 60 Capsules.

Asraul Capsules

It has been employed for centuries for the relief of various central nervous system disorders, both psychic and motor, including anxiety states, insomnia, excitement, sexual aggression, maniacal behavior associated with psychosis, hypochondriasis, melancholia, schizophrenia, insanity, insomnia and epilepsy in Indian medicine for about 4000 years. It contains Reserpine alkaloid which is used for mild, essential hypertension.

Composition: Each 500 mg capsule contains: Asraul Ext. (*Rauwolfia serpentina*) 200 mg, Asraul Powder (*Rauwolfia serpentina*) 300 mg

Indications: Hypertension, insomnia, stress and anxiety.

Dosage: 1 capsule in the morning and at night with water. Do not exceed recommended dosage.

Presentation: In packs of 30 Capsules.

Behman Capsules

It has shown to have a profound effect on the coronary circulation, reducing the symptoms of angina and improving heart function. It assist patients who are recovering from a heart attack and it appears to support heart function at this critical time. It is most effective when given as a preventive, rather than as a remedy after a heart attack has taken place. It particularly benefits the coronary circulation, opening up the arteries and improving blood flow to the heart and is therefore helping in treating coronary heart disease. Though it does not lower blood pressure, it relaxes the blood vessels and improves circulation throughout the body. It helps prevent blood clots from forming and is quite useful in the prevention and treatment of myocardial infarction.

Composition: Each 250 mg capsule contains: *Salvia haematodes* (Behman Ext.) 250 mg

Indications: Alzheimer's Disease, Angina, Anxiety, Arteriosclerosis, Depression, General Debility, Hypertension, Immune System Depletion, Insomnia, Myocardial Infarction, Nervous Exhaustion, Night Sweats and Palpitation.

Dosage: 2 capsules twice daily before meals with water.

Presentation: In packs of 60 capsules.

Purity Assured

Guggul Capsules

Guggul is a very effective herbal medicine for controlling obesity and cholesterol. Ketone fraction that is extracted from the oleo-gum-resin contains the most potent cholesterol lowering components, significantly lowers serum triglycerides and cholesterol as well as LDL and VLDL cholesterol (the 'bad' cholesterol). At the same time, it raises levels of HDL cholesterol (the 'good' cholesterol). It has also been shown to reduce the stickiness of platelets-another effect that lowers the risk of coronary artery disease.

Composition: Each 250 mg capsule contains: Commiphora mukul (Guggul Ext.) 250 mg

Indications: Atherosclerosis, High LDL Cholesterol Levels, Nervous Debility and Triglycerides.

Dosage: 1 capsule twice daily after meals with water.

Presentation: In packs of 30 capsules.

Lasuna Capsules

It was found to have a significant protective action against a fat induced increase in serum cholesterol and plasma fibrinogen and in fibrinolytic activity. The platelet and hypolipidemic activities of Garlic ensures smooth coronary function. Garlic is commonly used to fight infection, increase circulation and help prevent cardiovascular disease.

Composition: Each 200 mg capsule contains: Allium sativum (Lasuna Ext.) 200 mg

Indications: Arteriosclerosis, Cardiovascular Disorders, High LDL Cholesterol Level, Hypertension and Palpitation

Dosage: 1 capsule twice daily after meals with water.

Presentation: In packs of 60 capsules.

OTHER PROPRIETARY & GENERICS

Besides the above, Dehlvi manufactures a number of proprietary and generic medicines that are useful in Cardiovascular disorders. Some of them are : Apple Cider Vinegar (Seb Sirka), Arjuna Amla Ras, Arjuna Ras, Arq Ambar, Arq Bed Mushk, Arq Gaozaban, Arq Gulab, Arq Keora, Dawaul Misk Motadil, Dawaul Misk Motadil Jawaharwali, Habbe Jawahar, Heart-Care, Jawahar Mohra, Khamira Abresham Hakim Arshadwala, Kushta Aqeeq, Kushta Marwareed, Kushta Nuqra and Sharbat Angoor Shirin,
