Nature is our Laboratory

**Dehlvi**

*Over 95 years of Tradition & Trust Continues*

The digestive tract is a complete system of organs, which extends from the mouth to the anus. It comprises the digestive tract and the accessory organs of the liver, pancreas and gallbladder. The digestive tract is a tube about 8 meters long. It is divided into various sections, each with a specialized function. The aim of the system is to provide your body with energy and the raw materials for growth and repair, and to get rid of any waste. To work efficiently, your body needs sugars, fats and proteins. Special proteins called enzymes help break down the foods you eat into simple components for your body to use. Malfunctioning of the digestive tract leads to a gradual decay of the body and an increasing sense of unease. Liver is the largest organ and has more functions than any other human organ.

Some conditions such as anorexia, constipation, dyspepsia, heartburn and indigestion may cause occasional discomfort but usually do not indicate a serious problem. However, digestive disorders such as inflammatory bowel diseases, diarrhoea, dysentery, cirrhosis, hepatitis, ulcer, piles and gallstones are serious and potentially life-threatening ailments. Diarrhoea is the third largest cause of death by disease worldwide, claiming the lives of the most vulnerable - children and the elderly.

In modern system of medicine, the drugs often used in the treatment are antibiotics, antiulcer, antisecretory, antispasmodics, antacids, laxatives, enzymes, carminatives, antidiarrhoeals and hepatobiliary preparations.

These drugs are effective but have a number of side effects like nausea and vomiting, rash, headache, increased heart rate, dryness of mouth, etc. In chronic cases, the treatment is obviously prolonged. The herbal system has a number of medicines that not only provide symptomatic relief but attacks the root cause without any known side effects. Dehlvi Naturals has many useful preparations to treat gastrointestinal tract disorders.

## Cellulite Control Oil

The powerful combination of therapeutic oils in Cellulite Control Oil helps to improve blood flow to the cellulite and fatty deposits. It improves the metabolic rate in such tissues and therefore helps to reduce flab from arms, thighs, hips, buttocks and abdomen.

**Composition:** Each 100 ml. contains: Sesamum indicum (Roghan Kunjad) 15%, Brassica juncea (Roghan Sarson) 10%, Nigella sativa (Roghan Kalonji) 2%, Triticum vulgare (Roghan Gandum) 2%, Zingiber officinale (Roghan Zanjbil) 1%, Foeniculum vulgare (Roghan Badiyan) 0.5%, Cyperus rotundus (Roghan Nagarmotha) 0.5%, Punica granatum (Roghan Anardana) 0.5%, Base q.s.

**Indications:** Cellulite and fatty deposits.

**Usage:** Massage, knead and rub vigorously in a circular motion every night on hips, thighs and upper arms for 15-20 minutes and cover the area with a hot towel for 15 minutes. Allow it to remain there for 6-8 hours.

**Presentation:** In bottles of 100 ml.

## Dehlvi D.Ward Capsules

## Kuliah Bazoori-SF

It is a unique sugar free formulation, which assists the liver and kidneys to function in the normal way, maintaining these vital organs at the optimum healthy level. Purifies the blood by removing the contaminants from the circulating blood. Helps the liver to remove a number of toxic wastes, e.g., drugs, bacteria, parasites, food additives, chemicals, fats, alcohol, etc. It removes biliousness of liver, kidney and bladder by inducing excessive urination, and reduces fever caused by hepatic heat. It is useful in jaundice also. Prevents the formation of kidney stones and helps to dissolve the kidney and bladder stones too. Also acts as a diuretic. It normalizes urinary pH and alleviates burning during urination. It soothes an irritated and inflamed bladder due to its demulcent and anti-inflammatory activity. It is also useful in urinary tract infections.

**Composition:** Each 10 ml. contains: Chicorium intybus Root (Kasni) Cucumis sativus Seed (Kheera) each 1 gm, Cichorium intybus Seed (Kasni), Cucumis melo Seed (Kharbuza), Tribulus terrestris (Gokhru), Foeniculum vulgare Root (Saunf) each 500 mg, Sugar Free Base q.s.

**Indications:** Biliousness, blood impurities, burning sensation during urination, decreased urination, fever due to hepatic heat, inflamed bladder, jaundice, sluggish liver, urinary calculi and urinary tract infections.

**Dosage:** 10 ml each in the morning and evening. Contraindicated in 1st trimester of pregnancy. Can be used in 2nd trimester but with caution.

**Presentation:** In PET bottles of 200 ml and 500 ml.

## Mako Kasni Ras

It is effective in liver, spleen and kidney problems, beneficial in Hepatitis A, B, C and Jaundice. It has a protective effect on the liver and has shown hepatoprotective activity in cases of toxicity induced by drugs and chemicals. Also useful in chronic enlargement of liver (hepatomegaly). It is also useful in fever due to excessive bile. It ceases urinary tract.

**Composition:** Each ml contains: Solanum nigrum (Mako) 49.825%, Cichorium intybus (Kasni) 49.825%

**Indications:** Cirrhosis, fever, hepatitis, hepatomegaly, jaundice, kidney dysfunction, liver dysfunction, oedema, sluggish liver, splenitis and splenomegaly.

**Dosage:** 10 ml twice daily. 20-30 ml of water can be added according to taste. Honey may also be added.

**Presentation:** In PET bottles of 500 ml and 200 ml.

## Obelin Capsules / Pills

It is a herbal slimming product that helps in reducing obesity without any side-effects that are normally associated with various weight loss techniques, and helps in controlling and normalising the appetite and providing a satisfying feeling so that one does not feel constantly hungry. It dissolves the excess fat gradually. Dietary fads and reducing diets that produce quick results without effort are of doubtful effectiveness in reducing body weight and keeping it down, and most are actually deleterious to health. Available in pills and capsule forms.

**Composition: Capsule:** Each 500 mg. capsule contains: Dolichos biflorus Ext. (Kulthi), Armenian Bol (Bura Armani), Cateria lacca (Luk Maghsool), Asphaltum Ext. (Shilajit), Crataeva nurvala Ext. (Varun) each 40 mg, Foeniculum vulgare (Saunf), Ptychotis ajowan (Ajwain), Carum carvi (Kala Zeera) each 100 mg

**Pills:** Each 500 mg pill contains: Asphaltum (Shilajit), Cateria lacca (Luk Maghsool) 100 mg, Dolichos biflorus (Kulthi) each 100 mg, Crataeva nurvala (Varun), Ptychotis ajowan (Ajwain) each 75 mg, Binding Agent q.s.

**Indications:** In obesity, controls and normalises appetite, regulates the metabolism of fats and reduces bad cholesterol.

**Dosage:** 2 capsules / pills twice daily, preferably 30 minutes before meals with a glass of water.

**Presentation:** Packs of 60 Capsules / 60 Pills and 120 Pills.

## Pyleena Capsules / Ointment

Effective treatment for bleeding haemorrhoids, fissures, internal and external piles. Relieves pain and itching in both types of piles and promote swift and clean repair of the damaged tissues.

**Composition: Capsules:** Each 500 mg. capsule contains: Santalum album Ext. (Sandal Safed), Berberis aristata Ext. (Rassaut), Nyctanthes arbor-tristis Ext. (Harsinghar), Nyphaea lotus Ext. (Nilofar) each 50 mg, Salmalia malabarica Ext. (Mochras), Symplocos racemosa (Lodh Pathani), Mimosa pudica Ext. (Lajjalu), Melia azadirachta Ext. (Neem Fruit) each 75 mg

**Ointment:** Each 10 g contains: Cinnamomum camphora (Kafoor) 0.007 g, Mentha piperata Oil (Peppermint) 0.007 ml, Borax (Suhaga) 0.349 g, Bees Wax Yellow 0.908 g, Melia azadirachta Oil (Neem) 1.745 ml, Lamb's Marrow (Gooda Nali Mesh) 3.492 g, Clarified Butter (Ghee) 3.492 g

**Indications:** Internal and external piles, fissures and fistulas.

**Dosage: Capsules:** 2 capsules twice daily after meals.

**Ointment :** Apply locally once or twice a day before and after evacuation.

**Dosage:** 1 or 2 capsule twice daily after meals with water.

**Presentation:** In packs of 60 capsules.

## Mastagi Capsules

It is used for the treatment of diarrhoea. It has been used in Greece for centuries as a natural remedy for a broad range of gastrointestinal disorders such as gastritis, gastroesophageal reflux disease (GERD) and many types of intestinal inflammation. It strengthens the stomach, increases appetite and relieves flatulence. Also useful in sluggish liver. It is a safe and effective alternative to antibiotics in the treatment of stomach and duodenal ulcers and it has been shown to effectively eradicate *Helicobacter pylori*, which is often implicated as the cause for these G.I. conditions. Unlike antibiotics, mastic gum does not eradicate the friendly bacteria in the intestines, which are important to health.

**Composition:** Each 250 mg capsule contains: Pistacia lentiscus (Mastagi) 125 mg, Excipient 125 g

**Indications:** Weakness of digestive system, liver dysfunction, diarrhoea, excessive salivation, excessive micturition, sluggish stomach and sluggish liver.

**Dosage:** 1 capsule in the morning and evening with water.

**Presentation:** In packs of 30 capsules,

## Senna Capsules

It is a very effective laxative and purgative and is a particularly useful remedy for the occasional bout of constipation and is useful for evacuation relief in cases of fissures, haemorrhoids, after rectoanal operations, and in preparation of diagnostic intervention in the gastrointestinal tract. It irritates the lining of the large intestine, causing the muscles to contract strongly resulting in bowel movement and also stops fluid being absorbed from the large bowel helping to keep the stool soft. They are sure and safe even for children (over 12 years of age) and weak and elderly persons.

**Composition:** Each 250 mg capsule contains: Cassia angustifolia Ext. (Sana Patti) 250 mg.

**Indications:** Habitual constipation and intestinal worms,

**Dosage:** 2 capsules at night with water. Combine with 1 capsule of Adrak to increase its palatability. This product is not to be used for more than 10 days consecutively.

**Presentation:** In packs of 60 capsules.

## Vilayati Imli Capsules

It is known to interrupt the synthesis of various lipids, fatty acids, LDL cholesterol and triglycerides. It is best used as an appetite suppressor. The appetite is suppressed by promoting synthesis of glycogen, thus sending the brain signals of satisfaction and fullness sooner.

**Composition:** Each 500 mg capsule contains: Garciana cambogia Extt (Vilayati Imli) 500 mg

**Indications:** Obesity and High HDL Cholesterol levels.

**Dosage:** 1 or 2 capsules twice daily after meals with water.
